

EONASSETSMINING

PRODUCT REQUIREMENTS DOCUMENT (PRD)

Version: 1.0

1. PROJECT OVERVIEW

EonAssetsMining is a web-based investment management platform consisting of:

- User Dashboard
- Admin Dashboard

The platform allows users to deposit funds, purchase investment plans, earn daily profits, participate in engagement features such as Daily Check-In, Gift Codes, Referral Tasks, and Spin Wheel rewards.

The Admin Dashboard serves as the operational control center of the entire platform and is responsible for managing all platform functionality, content, financial settings, user permissions, engagement systems, and business rules.

All configurable features must be manageable from the Admin Dashboard without modifying application code.

2. USER ROLES

Admin

Single administrator with unrestricted access.

Responsibilities:

- User management
- Financial management
- Platform configuration
- Plan management
- Reward management
- Content management
- Email configuration
- Country and currency management

- Cloudinary

Queue Processing:

- Redis
- BullMQ

7. CORE PRINCIPLE

Every user-facing feature must be configurable from the Admin Dashboard.

The Admin Dashboard serves as the master control center for EonAssetsMining, allowing a single administrator to manage platform operations, user activities, financial transactions, rewards, content, settings, and business rules without requiring code changes or system redeployment.
