

EONASSETSMINING

Full Product Requirements Document

EONASSETSMINING - Product Requirements Document (PRD)

Comprehensive product specification covering user dashboard, admin dashboard, financial engine, rewards, settings, content management, and system architecture.

1. Product Overview

EonAssetsMining is a configurable investment platform consisting of a User Dashboard and a single Admin Dashboard. The admin controls all business logic, content, rewards, settings, plans, deposits, withdrawals, and user permissions.

2. User Roles

Roles: Admin and User. Admin has unrestricted access. Users can register, deposit, invest, withdraw, redeem gift codes, claim rewards, and view platform content.

3. User Dashboard

Dashboard, Investment Plans, Deposits, Withdrawals, Gift Codes, Daily Check-In, Spin Wheel, Referral Tasks, News Center, Partners, Live Market, Profile, Transaction History.

4. Investment Plans

Plan fields: image, name, duration, daily income, minimum deposit, maximum deposit, capital return, status. Users can purchase active plans.

5. Deposits & Withdrawals

Supports configurable payment methods, bonuses, limits, automatic/manual processing, withdrawal windows, and investment requirements.

6. Gift Codes

Admin creates codes with amount, usage limits, status, and tracking. Users redeem codes for rewards.

7. Daily Check-In

7-day reward system. Admin can enable/disable, create reward days, update rewards, and monitor claims.

8. Spin Wheel

Prize management, probabilities, jackpot configuration, free spin rules, spin cost configuration, user-level permissions, and platform-wide controls.

9. Referral Tasks

Referral-based task rewards. Admin controls referral requirements, reward amounts, and task status.

10. News Management

News articles with images, content, categories, featured status, timestamps, and view counts.

11. Partner Management

Admin-managed partner logos and information displayed on the user dashboard.

12. Live Market Module

Cryptocurrency assets with symbol, name, trading pair, logo, and status. Admin can enable/disable globally.

13. Customer Management

View users, edit users, delete users, reset passwords, login as user, credit/debit balances, manage permissions, and review activity.

14. Activity Monitor

Tracks registrations, deposits, withdrawals, purchases, logins, rewards, profile updates, admin actions, and security-related events.

15. Purchase Management

Tracks all plan purchases, purchase dates, status, plan information, and user information.

16. Slider Management

Admin uploads promotional images and chooses display locations such as homepage, VIP page, and dashboard.

17. Platform Settings

Site branding, currency, timezone, support channels, notices, bonuses, withdrawal requirements, referral commissions, and operational controls.

18. Country & Currency Management

Country code, currency code, symbol, exchange rate, auto-updating exchange rates, and country status.

19. Language Management

Language code, native name, text direction, default language configuration, and multilingual support.

20. About Us & Team

Admin manages company content, images, team members, roles, and public-facing information.

21. Referral Commission Engine

Three-level referral commission system based on investment earnings.

22. Payment Methods & Payout Cryptocurrencies

Configurable deposit and withdrawal methods with limits, charges, supported networks, and fees.

23. Email Configuration

Email triggers for deposits, withdrawals, profits, capital returns, and news updates. Includes email logs.

24. Financial Engine

Automated daily profit distribution, capital return processing, referral payouts, reward distribution, and transaction logging.

25. Database Architecture

35+ core tables including users, plans, investments, deposits, withdrawals, transactions, gift codes, tasks, spins, settings, logs, and content management.

26. Security Requirements

Authentication, password resets, audit logs, transaction ledger, activity monitoring, and admin action tracking.

27. Technical Stack

Next.js 16, JavaScript, Tailwind CSS, Shadcn UI, PostgreSQL, Prisma ORM, Redis, BullMQ, Cloudinary.

28. Development Milestones

Authentication → Users → Settings → Deposits → Withdrawals → Investments → Profit Engine → Referrals → Rewards → Content Modules → Reporting.

29. Core Principle

Every user-facing feature must be configurable from the Admin Dashboard without code changes or redeployment.
